During my career I've been a key person on several startups as well as on a big enterprise project working for HP. I have strong technical, management and self-management skills. Being a good team player and mentor I'm trying to boost team performance and improve the quality at any project I'm working on.

DEVELOPMENT MANAGER / SOFTWARE ARCHITECT

PROFFESIONAL SUMMARY

Working in commercial organizations since 2007, I took over different positions and responsibilities such as R&D Software Engineer, Team Lead and Architect. I was mainly focusing on designing and developing software systems using Micro-Service architecture. Leading an international distributed team, I was able to build a very strong department within the organization. Being keen on innovations and new technologies, I always try to build flexible and maintainable solutions minimizing effort and risks.

SKILLS

- Programming languages: **Java, JavaScript**
- Databases: **MySQL, MSSQL, Oracle, PostgreSQL**
- NoSQL: **Cassandra, Redis**
- Other: **Spring Framework, Spring Boot/Cloud, Hibernate, iBatis, JSF (IceFaces), SOLR, ELK, Kafka, RabbitMQ, Docker, Kubernetes**
